

Elementary STEM

November Newsletter

It's hard to believe we are already into November!

Kindergarten , First Grade and Second Grade did a wonderful job with their first rotations! They have learned so much about coding and for the next couple of weeks they will get to use that knowledge to program robots! I will be gone for the next two weeks so they will be working with a sub to program and code Ozobots. Ozobots are small line-following robots. The kids will be working on making a path for their robot to follow and adding code to it to change the direction and speed of the robot. These are always a lot of fun for the kids to work with and I know they are excited! The last two weeks of November they will be showing what they have learned with coding and beginning our next project in Pixie!

Third, Fourth and Fifth grades have been working on their rotations and given a presentation on each center that they have worked on. They did a good job with learning our new format for the presentations and will be continuing to master that with each rotation. On November 5th, these classes will be having music instead of STEM to help them get ready for the program on the 8th. November 12th, I will be gone so they will be working with a sub on Ozobots. The kids always love to code the Ozobots so they are excited to get to work with them! The last couple of weeks of November we will be continuing with our first rotation and finish it after the first of the year.
